Training Institution: *Hanoi Law University*

**SUMMARY OF NEW RESEARCH FINDINGS
OF THE DOCTORAL DISSERTATION**

Firstly, building and perfecting the theoretical system of crimes in the field of information technology and telecommunications networks such as crime concept, characteristics and classification. With this theoretical system, it will contribute to clarify theoretical issues and enrich knowledge about such crime.

Secondly, analyzing the elements of crimes and punishments of crimes in the field of information technology and telecommunications networks in accordance with the 2015 Criminal Code. Providing comments, comparison and assessment to these regulations with standards and trends of international law on crimes in the field of information technology and telecommunications networks to find out the compatibility or incompatibility points of Vietnam's Criminal Code. That is a required base in the proper application of these regulations in practice and perfecting of these regulations.

Thirdly, summarizing and assessing the practice of applying provisions of the Criminal Law on crimes in the field of information technology and telecommunications networks in the period of 2009 - 2020. Through which the Dissertation assesses the achieved results as well as the difficulties, limitations, problems and causes in the process of applying provisions of the Criminal Law on this crime.

Fourthly, proposing a number of solutions to improve the application efficiency of the 2015 Criminal Code provisions on this crime in the coming time. These are practical recommendations with reference value for competent authorities in the promulgation of laws and in the fight against crimes in the field of information technology and telecommunications networks at present.
